Professional Summary

Dedicated Computer Science student specializing in Cybersecurity, actively available for full-time roles. Proven military team leader with expertise in developing scalable full-stack applications, AI-driven solutions, and autonomous systems. Passionate about tackling complex engineering challenges and rapid execution across diverse technological domains.

Education

Bachelor of Science in Computer Science, Specialization in Cybersecurity

The Open University of Israel, Tel Aviv, Israel | Expected Graduation: Summer 2027

- Successfully completed 78 credit points with a current GPA of 85.
 - Future Plan: Intend to pursue a Master of Business Administration (MBA).
-

Professional Experience

IRIS Program June 2026 – Jan 2027

AI Developer & Entrepreneur

- Developing "[AR Technician Assistant](#)", an AI video assistant startup designed to replace human experts for military/field technicians with real-time AI/AR guidance.
- Integrating WebRTC, Google Gemini Live, and a custom 2D/3D diagram engine for hands-free problem solving.

Israel Defense Force Apr 2022 – Feb 2026

Head of IT Team (Reserves) & Network Management

- Led a 5-soldier IT department, managing and securing base-wide communication networks and defense systems.
 - Managed a 5.5 million NIS telecommunications budget and directed independent infrastructure procurement.
-

Projects

[Road to Global Cup](#) (iOS Mobile Game) | Unity 6, C#, Apple Game Center

- Solo-developed a 3v3 arcade football game for iOS, managing the full lifecycle to App Store publication.
- Implemented custom AI, dynamic obstacle rendering, host-authoritative 1v1 multiplayer, and a virtual economy.

[Caliq](#) (AI-Powered Nutrition Coach) | React Native, TypeScript, Gemini 2.0 Flash, SQLite

- Engineered a cross-platform mobile app instantly calculating meal macros from photos using multimodal AI.

[OmeTheTrader](#) (Quantitative Trading Bot) | Python, PyTorch, MetaTrader 5, ZeroMQ, GCP

- Architected an automated trading system for US equities using a PyTorch LSTM signal engine and HMM regime.
 - Developed a ZeroMQ bridge to a custom MQL5 EA for execution, managing dynamic slippage and trailing stops.
-

Technical Skills

AI Coding & Automation: Claude Code, Gemini, Cursor, Codex, VS Code.

Programming Languages: Python, C, C++, Java, TypeScript, C#, MQL5, SQL.

Frameworks & Libraries: React Native, React 19, FastAPI, PyTorch (LSTM), Unity 6, Pandas, NumPy.

Cloud, APIs & Infrastructure: AWS (EC2), Google Cloud (GCP), Linux/Bash, Docker, CI/CD (GitHub Actions), Vercel, SQLite, WebRTC/WebSockets, ZeroMQ, Telegram Bot API.

Cybersecurity & CS Concepts: Applied Cryptography (HMAC, PBKDF2), Network Security (CORS, Rate Limiting), Defensive Programming, Concurrency, Algorithms, Data Structures, OOP.

Youth Leadership & Mentoring: 3 years at Maccabi Tzair Youth Movement.
