Professional Summary

Computer Science and Cybersecurity student who ships AI-driven products end to end: Road to Global Cup, a live iOS game on the App Store, and an autonomous trading bot. Former IDF IT team leader who led a 5-soldier department and a 5.5M NIS infrastructure budget.

Education

Bachelor of Science in Computer Science, Specialization in Cybersecurity
The Open University of Israel, Tel Aviv, Israel | Expected Graduation: Summer 2027
- Successfully completed 78 credit points with a current GPA of 87.
- Future Plan: Intend to pursue a Master of Business Administration (MBA).

Professional Experience

Lumosource (formerly Tenders Finder) 2026 – Present
Co-Founder & Full-Stack Engineer
- Co-founded with two reservists a B2B SaaS that collects ~900 new tenders a day (Israeli MOD, EU TED, UK Find a Tender) and matches them to company profiles. Live at **lumosource.org**.
- Multilingual semantic matching (Hebrew, English, EU languages) with daily email alerts.
- Built an AI profile-building chat with live tender previews and a bid pipeline; migrated to Google Cloud (Cloud Run, Scheduler, Load Balancer) and re-embedded on Vertex AI with zero downtime.
- Stack: Python, Playwright, Next.js, PostgreSQL + pgvector, Gemini, Docker; 610 tests in CI.

Israel Defense Force Apr 2022 – Feb 2026
Head of IT Team (Reserves) & Network Management
- Led a 5-soldier IT department, managing and securing base-wide communication networks and defense systems.
- Managed a 5.5 million NIS telecommunications budget and directed independent infrastructure procurement.

Projects

Road to Global Cup (iOS Mobile Game) | Unity 6, C#, Apple Game Center
- Solo-developed a 3v3 arcade football game for iOS, managing the full lifecycle to App Store publication.
- Implemented custom AI, dynamic obstacle rendering, host-authoritative 1v1 multiplayer, and a virtual economy.

OmeTheTrader (Quantitative Trading Bot) | Python, PyTorch, MetaTrader 5, ZeroMQ, GCP
- Architected an automated trading system for US equities using a PyTorch LSTM signal engine and HMM regime.
- Developed a ZeroMQ bridge to a custom MQL5 EA for execution, managing dynamic slippage and trailing stops.

Technical Skills

AI Coding & Automation: Claude Code, Gemini, Cursor, Codex, VS Code.
Programming Languages: Python, C, C++, Java, TypeScript, C#, MQL5, SQL.
Frameworks & Libraries: React Native, React 19, FastAPI, PyTorch (LSTM), Unity 6, Pandas, NumPy.
Cloud, APIs & Infrastructure: AWS (EC2), Google Cloud (GCP), Linux/Bash, Docker, CI/CD (GitHub Actions), Vercel, SQLite, WebRTC/WebSockets, ZeroMQ, Telegram Bot API.
Cybersecurity & CS Concepts: Applied Cryptography (HMAC, PBKDF2), Network Security (CORS, Rate Limiting), Defensive Programming, Concurrency, Algorithms, Data Structures, OOP.
Youth Leadership & Mentoring: 3 years at Maccabi Tzair Youth Movement.
